**Qualitative Disclosure**

- (a) **The main drivers of their LCR results and the evolution of the contribution of inputs to the LCR's calculation over time;**

RBI had introduced the liquidity coverage ratio (LCR) to ensure that NBFC has an adequate stock of unencumbered high-quality liquid assets (HQLA) to survive a significant liquidity stress lasting for a period of 30 days. LCR is defined as a ratio of HQLA to the total net cash outflows estimated for the next 30 calendar days.

The Company has an Asset Liability Management Committee (ALCO), a management level committee to handle liquidity risk. The ALCO meets at periodic intervals. At the apex level, the Risk Management Committee (RMC), a sub-committee of the Board of Directors of the Company, oversees the liquidity risk management. The RMC subsequently updates the Board of Directors on the same.
